

POLYCARBONATE SHIELDS CLEANING AND CARE INSTRUCTIONS IMPORTANT!

CLEANING INSTRUCTIONS

Only clean using a soft cloth or sponge. Wash using a mild soap or detergent (see list of approved cleaning products below) and lukewarm water. When cleaning, never use a paper towel. Rinse well with clean water. Dry thoroughly with a chamois or moist cellulose sponge to prevent water spots from hard water or soaps.

Do not scrub the surface hard or use paper towels or brushes on this product to prevent dulling the finish.

The following cleaning agents have been found compatible with polycarbonate:

- Joy
- Top Job
- Palmolive Liquid

MINIMIZING HAIRLINE SCRATCHES

Should scratches and minor abrasions appear, they can be minimized by using a mild automobile polish to polish the surface of the shield. It is recommended that a small area be tested with the product selected prior to use on the entire window. Always follow the manufacturer's recommended instructions on the label.

Listed below are 3 products that have proven to be successful to polish and fill scratches:

- Johnson Paste Wax
- Novus Plastic Polish #1 & #2
- Mirror Glaze Plastic Polish

IMPORTANT CLEANING “DON'TS”

- DO NOT use abrasive or highly alkaline cleaners.
- Never scrape polycarbonate with squeegees, razor blades or other sharp instruments.
- Benzene, gasoline acetone or carbon tetrachloride should never be used.
- DO NOT clean polycarbonate in hot sun or at elevated temperatures as it is more susceptible to scratch when the shield surface is hot.
- DO NOT clean with paper towels, they will dull and scratch the surface.

SHIELD CLEANING KIT

- One 8 oz. Novus clean and shine
- One 8 oz. Novus scratch remover
- Two microfiber towels

Part # CHA1810
