

Flag Clip Adjustment Maintenance

Flagstaffs with retaining clips must have the clips maintained on a regular basis to ensure the clips do not pop off and become lost. We recommend upgrading to the premium thumbscrew style staff (FC1100) OR if you prefer to stick with this style, taking the steps below before each use to avoid this issue.

Remove retaining clip from the staff.

Hold clip near the bend.

Using two hands, bend the clip inward. Repeat before each use to avoid clip loss.
